E POST

Information workflows that keep your business moving.

E-POST:
Document management systems to optimize engineering and manufacturing business processes.

Companies in the engineering and manufacturing (E&M) sector are increasingly faced with the need to keep costs down while maintaining high efficiency. Digital solutions from E-POST are designed with this in mind, and will help companies stay ahead in this evolving landscape.

Accurate and accessible document workflows
Product convergence, emerging markets and new environmental challenges are shaping realities in the E&M sector today. With product commoditization, services are becoming a key differentiator and driver for higher revenues and margins. There is increasing environmental regulation by governments and higher customer demand for energy efficiency.

To cope with these new demands, companies have to work towards building an efficient infrastructure that will allow for consolidation, process standardization and real time visibility.

As a leading logistics provider, E-POST recognizes the importance of delivering information accurately and on time. We do this by centralizing your information workflows and document management processes.

What E-POST can offer you:

- More efficient worldwide workflows
- Reduced emissions through digitalization
- Centralized data services

Deutsche Post

Maintaining streamlined workflows that increase business efficiency worldwide.

Deutsche Post E-POST has solutions to support different functions in engineering and manufacturing

MRO (Maintenance, Repair and Overhaul)	**Parts Certification**	**International Trading**
◾ 24/7 data retrieval ◾ Centralized and secure data hosting ◾ Life cycle documentation of goods	◾ On-premise digitization ◾ Warehouse management ◾ Spare parts service	◾ Cloud data access ◾ Distribution of manufacturing components
Optimization and digitalization of paper-intensive processes drive down costs and reduce emissions	Digitization of parts certificates, i.e. aircraft parts, to provide easy access/ compliant audit trail for internal and external users and authorities	International distribution of manufactured goods is dependent on timely and accurate documentation workflows worldwide

Workflow management of documents related to MRO

	E-POST Hub Centre / E-POST Network	
◾ E-POST picks up hard copies from customer site ◾ Customer sends hard copies to E-POST hub centers ◾ Electronic files sent to E-POST server	◾ E-POST digitizes the documents ◾ E-POST uploads all the scanned files/images to hosting servers ◾ Web hosting by E-POST ◾ E-POST performs OCR* and data processing ◾ Customer retrieves the MRO documents electronically	◾ Physical copies are sent to E-POST records management site ◾ Retrieval services for when customers require certified true copies (physical copies)

* Optical Character Recognition (OCR) to capture relevant information from the documents, which can be used for further processing.

E-POST is your trusted partner in the field of document management
With our solution, you will optimize your business processes and enjoy lower production costs. Sale of facilities and systems can take place smoothly with fast and accurate retrieval of parts certification. Easy access to country-specific information and documentation will facilitate international trading.

Our solution experts will work with you to identify, analyze and implement the right solutions that will increase transparency and efficiency in your engineering and manufacturing business processes.
