Shipping Goods

Goods refer to any tangible and movable objects other than money, including objects of merchandise. Goods must not be sent as Deutsche Post Business Mail. Items containing goods have to be sent with one of our packet products, regardless of size and weight.

All items containing goods must have a customs declaration on the address side if they are sent to non-EU countries.

Examples being: clothes, books, computer or tablet, electrical equipment, event tickets, footwear, mobile phone accessories, CDs storing commercial music or software, DVDs storing commercial movies or software and magazines with items such as CD/DVDs or samples enclosed with the publication.

Items such as magazines and personal data on DVD or CD i.e. personal photos or home videos can be sent as Business Mail.

Customers sending goods must have a return address in the EU Customs Union.

In case of goods, pickup is only possible within the EU Customs Union.

Contents excluded in all Deutsche Post products

Dangerous and prohibited goods, i.e. lithium batteries as well as goods that do not comply with the import restrictions of the destination country, are prohibited to send.

For more detailed information please refer to General Terms and Conditions Deutsche Post AG International Business, Dialogue Marketing, Packet.
Deutsche Post Packet Products

With our Deutsche Post Packet products we offer a wide range of solutions for your shipment of goods to over 220 countries.

Rates

Customer-individual rates are calculated on request and are valid for the full calendar year.

The calculation for Deutsche Post Business Mail and Packet products is based on the customer-individual shipment profile. The rates are calculated ex mail terminal Frankfurt or London.

They are based on the international terminal dues system for invoicing between postal companies.

This terminal dues system is based on an item and kg pricing method. All items are billed according to their actual weight in gram.

On request Deutsche Post International offers pickup directly from the customer and transport to IPZ Frankfurt.

The following example explains the pricing structure and how rates are calculated:

<table>
<thead>
<tr>
<th>Example calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rate per item Rate per kg</td>
</tr>
<tr>
<td>--------------------------</td>
</tr>
<tr>
<td>1.00 €</td>
</tr>
</tbody>
</table>

The price is calculated by adding together the item price and the kilogram price:

\[
\begin{align*}
1 \text{ Item} \times \text{EUR} 1/\text{item} &= \text{EUR} 1.00 \\
0.126 \text{ kg} \times \text{EUR} 10/\text{kg} &= \text{EUR} 1.26 \\
\text{Total price:} &= \text{EUR} 2.26
\end{align*}
\]
Customs Regulations – What you need to know

With our Deutsche Post Packet products you benefit from simplified postal customs clearance:

**Customs declaration**
- In case of customs clearance, all items containing goods must have a CN 22 customs declaration form on the address side.
- The CN 22 document is already included in the label and can be easily generated via the Deutsche Post Customer Portal/API.
- The customer is obliged to inform himself/herself about current customs regulations and to observe them. The sender is responsible for compliance with the customs and import regulations of the destination countries.

**Electronic pre-advice**
- More and more customs authorities require that incoming packets are accompanied by electronic pre-advice customs data.
- With our Deutsche Post Customer Portal and other integration channels your international shipments meet all requirements for electronic customs pre-advice.
How to present international mail

All items shipped on one day using the same product should be consolidated into one shipment.¹)

Items belonging to different shipments must be physically separated and thus put into different receptacles.

For each shipment an airwaybill (AWB) has to be created – ideally via our Deutsche Post Customer Portal or other integration channels. Please see further information on the next page.

The airwaybill is necessary to document the handover of shipments and is the basis for billing.

In case of high volumes we recommend presorting according to format and destination country to accelerate the process.

¹) Business Mail Priority shipments may include items with and without registered service
Airwaybill

It is easy to create your shipping documents with our Deutsche Post Customer Portal or other integration channels.

Airwaybill (AWB)
Each shipment must be accompanied by a fully completed AWB including the correct authorization number.

Airwaybills can be easily and conveniently created via the Deutsche Post Customer Portal or other integration channels.

Receptacles
When preparing your mail for dispatch you may use either bags, boxes, pallets or pallet boxes. Receptacles should be disposable and will not be returned. The maximum weight of a bag or a box must not exceed 25 kg. Pallets must not exceed the height of 1.60 m due to work safety.

Copies of AWB must be affixed to each receptacle in a clearly visible manner.

In case you have sporadic shipments which are bigger than 250 kg, please pre-alert our Mailterminal (MTPreAlert@deutschepost.de) as soon as possible to ensure a smooth handling process.

Deutsche Post International Mail STOP note
A Deutsche Post International STOP note must be attached to each receptacle. This STOP note will not be necessary if items are delivered to our mail terminal in London. A printable file will be provided by your local sales support team.
Indicia

Each item has to carry a PPI (postage paid impression).

For the following products this label must be generated via Deutsche Post Customer Portal or one of our integration channels:

- Deutsche Post Packet Tracked
- Deutsche Post Packet Plus
- Deutsche Post Packet Priority with customs declaration form
- Deutsche Post Packet Standard with customs declaration form

For items without tracking or without CN 22 customs declaration form (e.g. Deutsche Post Business Mail) the label can be created by the customer – according to Deutsche Post specifications as described in our Service and Handling Brochure.

The label has to be approved before shipping.
Please contact your local sales manager.
Return of undeliverable items

Deutsche Post International provides you with dedicated German PO box free of charge.

**German PO box required**

- According to international postal regulations each item must carry a unique German return address
- Deutsche Post International provides a dedicated German PO box free of charge for all customers using Deutsche Post Business Mail or Deutsche Post Packet products
- The customer has to provide an address undeliverable items should be returned to
- For Deutsche Post Business Mail the use of the dedicated PO box is not mandatory. If this PO box is missing, undeliverable items may be destroyed

**Excluded**

- Another return address (e.g. in the destination country) than this dedicated PO box is not allowed
- Customer name on the item must not refer to the country of origin or representation in the destination country
Integration Channels

We offer a convenient range of integration channels to ensure best quality of service, compliance with customs regulations and efficient processing.
